In essence, the Stabilized Earth pathway could be conceptualized as a regime of the Earth System in which humanity plays an active planetary stewardship role in maintaining a state intermediate between the glacial–interglacial limit cycle of the Late Quaternary and a Hothouse Earth . We emphasize that Stabilized Earth is not an intrinsic state of the Earth System but rather, one in which humanity commits to a pathway of ongoing management of its relationship with the rest of the Earth System.

Trajectories of the Earth System in the

Competence in general knowledge
about the Earth and environmental
sciences will be assessed by a written
examination taken after the end of the
second semester. The thesis advisor,
in concert with the E&ES faculty, will
construct several questions. The
student will then have two days to
answer these questions.
