In *The Convergence of K-12 and Higher Education*, two leading scholars of education policy bring together a distinguished and varied array of contributors to systematically examine the growing convergence between the K-12 and higher education sectors in the United States. Though the two sectors have traditionally been treated as distinct and separate, the editors show that the past decade has seen an increasing emphasis on the alignment between the two. At the same time, the national focus on outcomes and accountability, originating in the K-12 sector, is exerting growing pressure on higher education, while trends toward privatization and diversification—long characteristic of the postsecondary sector—are influencing public schools. This volume makes the powerful case that it is no longer possible to think of one sector in the absence of the other, given the economic, demographic, and technological forces that are pushing the educational system toward convergence. Taken together, the chapters in this book provide a promising new line of inquiry for examining contemporary questions in education policy.

*GATEWAYS TO DEMOCRACY* introduces the American political system to students, pointing out in each chapter the gateways that facilitate, or at times block, participation. In emphasizing how the political system works, and how individuals and groups have opened gates to influence public policy, the text helps students see the relevance of government in their lives. The fourth edition provides coverage of the 2016 election, as well as enhanced discussion of diversity and participation that reflects the changing demographic infrastructure in America. Focused on physical literacy and measurable outcomes, empowering physical educators to help students meet the Common Core standards, and coming from a recently renamed but longstanding organization intent on shaping a standard of excellence in physical education, National Standards & Grade-Level Outcomes for K-12 Physical Education is all that and much more. Created by SHAPE America – Society of Health and Physical Educators (formerly AAHPERD) – this text unveils the new National Standards for K-12 Physical Education. The standards and text have been retooled to support students' holistic development. This is the third iteration of the National Standards for K-12 Physical Education, and this latest version features two prominent changes: •The term physical literacy underpins the standards. It encompasses the three domains of physical education (psychomotor, cognitive, and affective) and considers not only physical competence and knowledge but also attitudes, motivation, and the social and psychological skills needed for participation. • Grade-level outcomes support the national physical education standards. These measurable outcomes are organized by level (elementary, middle, and high school) and by standard. They provide a bridge between the new standards and K-12 physical education curriculum development and make it easy for teachers to assess and track student progress across grades, resulting in physically literate students. In developing the grade-level outcomes, the authors focus on motor skill competency, student engagement and intrinsic motivation, instructional climate, gender differences, lifetime activity approach, and physical activity. All outcomes are written to align with the standards and with the intent of fostering lifelong physical activity. National Standards & Grade-Level Outcomes for K-12 Physical Education presents the standards and outcomes in ways that will help preservice teachers and current practitioners plan curricula, units, lessons, and tasks. The text also • empowers physical educators to help students meet the Common Core standards: • allows teachers to see the new standards and the scope and sequence for outcomes for all grade levels at a glance in a colorful, easy-to-read format; and • provides administrators, parents, and policy makers with a framework for understanding what students should know and be able to do as a result of their physical education instruction. The result is a text that teachers can confidently use in creating and enhancing high-quality programs that prepare students to be physically literate and active their whole lives.
