The new edition of this seminal text outlines the fundamental aspects of the German approach to criminal procedure. It explores a wide range of issues from setting out the basic procedural principles to presenting the main players in the criminal justice system, pre-trial investigations, the path from indictment to trial judgment, rules of evidence, sentencing, and appeals and post-conviction review. As far as it is useful for an introductory text, the differences between proceedings against adults and juveniles are highlighted. The theoretical discussion of decision-making and style of judgment writing is supported by practical insights through specimen translations of an indictment, a trial judgment and an appellate judgment by the Federal Court of Justice.

German substantive criminal law has been influential in many civil law countries, most notably in the Hispanic world. In the common law countries, not surprisingly because of the systemic differences in approach, its impact has been much less, if not negligible. This may be largely explained as a result of the language barrier. An up-to-date and reliable English translation of the German Criminal Code has been conspicuously missing for some time. This book presents a new English translation of the Strafgesetzbuch, (the Criminal Code), in its most recent amended form of August 2007. The Code is the centrepiece of German substantive criminal law and informs the interpretation and application of any other criminal provisions which can be found in specific legislation. The translation thus affords an opportunity to profit from a legal tradition that has had a major influence over history and has a rich experience of doctrinal analysis. The translation adheres as closely as possible to the textual structure of the original, but has been made palatable to an English ear. It is intended as a companion to the author's Principles of German Criminal Law which was published in December 2008. Increasingly, international governmental networks and organisations make it necessary to master the legal principles of other jurisdictions. Since the advent of international criminal tribunals this need has fully reached criminal law. A large part of their work is based on comparative research. The legal systems which contribute most to this systemic discussion are common law and civil law, sometimes called continental law. So far this dialogue appears to have been dominated by the former. While there are many reasons for this, one stands out very clearly: Language. English has become the lingua franca of international legal research. The present book addresses this issue. Thomas Vormbaum is one of the foremost German legal historians and the book's original has become a cornerstone of research into the history of German criminal law beyond doctrinal expositions; it allows a look at the system ' s genesis, its ideological, political and cultural roots. In the field of comparative research, it is of the utmost importance to have an understanding of the law ' s provenance, in other words its historical DNA.

XIV Seen as a whole, however, I regard the work before us to be especially noteworthy precisely because of its illumination of both the social contexts surrounding the law and the ideas which underlie the efforts towards criminal law reform. An analysis of this kind has not appeared until now, to my knowledge, even in the German literature on the subject, so that this book is of great value to - the German reader as well as the American. B. Particulars In Chapter IV: A the authors give a general introduction into the development of the German criminal law reform. In that connection they recognize the special role of the Christian Democratic (CDU), Socialist (SPD) coalition in the political situation [leading to passage of the reform law]. The authors emphasize the importance of the introduction of a uniform prison sentence [that is to say - the termination of the distinction between kinds of prison sentences] and the elimination of short term prison sentences, as the main points of the reform in the "general part" of the code. They remark (pages 170; 192) that a uniform concept of the goal of punishment is still lacking, although, when all is said, there is a general agreement on the principle of resocialization.
